The diagram illustrates a data flow where two functions, SPI1_ReadBlock and SPI1_WriteBlock, both point to a single function, SPI1_ExchangeByte. SPI1_ReadBlock and SPI1_WriteBlock are represented by white boxes with black borders, while SPI1_ExchangeByte is represented by a gray box with a black border. Two blue arrows originate from the right side of the SPI1_ReadBlock and SPI1_WriteBlock boxes and point towards the left side of the SPI1_ExchangeByte box.
